

# BH Update - Mar 15th

## General updates

- Voltera
  - Requested 3 samples:
    1. Ribbon cable samples from New machine
    2. Boards XR from Viejo
    3. General samples from both machines.
- PCBWAY
  - Order was placed through DHL.
- ITLA
  - Meeting is tentatively for 10:30am next Wednesday (Mar 22th) , waiting for final confirmation to set the event on Calendar.
  - Remember they proposed two kinds of students.
    - A) A project given to them to a group for it to be the final for their career.
    - B) Internship, which they need mandatory to graduate [400hrs] [average: 10-15 students per quarter from mechatronics].
  - List of potential project [Design and Engineering]:
    - Technical drawing of all the tapes [755 tapes according to master\_partlist].
    - Make the rubber fixture used for lamination with the CNC.

## BH Report

Today I've focused my attention to the multifunctional jig usage. Also went over pre kitting, keys and cosmetic inspection about the flexes.

---

### #1

I've noticed an issue with disassembly, assembly and keys. Every time they need to do some work with the keys, they need to press it to make the job easier. So a fixture with extrusions that can press the keys up while the phone is pressed down could help greatly.
