BH Report

So I started to gather some information :

For about the 450 XR and 125 IP11

- Only 15 didn't pass functional because of Charging Port
 - These Charging port passed cosmetics a second time.
- ~7 didn't pass functional because of side-key.
 - 90% were wrongly assembled and the other 10% was broken flexes.
- The multifunctional XR broke this morning, the charging port of the daughter board.
 - It lasted for about ~100 uses approximately.
